CHATHURAN DANNORUWA

Software Engineer | Java, Spring Boot, Microservices, AWS & CI/CD

Adelaide, SA chathuran.dc@gmail.com +61450910587 in/chathurane chathuran.github.io

PROFESSIONAL SUMMARY

Software Engineer with 8+ years of experience designing, developing and maintaining enterprise applications and cloud-hosted platforms. Strong expertise in Java, Spring Boot, microservices, REST APIs, relational databases and AWS, complemented by hands-on full-stack development experience using Vue.js, React and JavaScript/TypeScript. Experienced across the software development lifecycle, including solution design, implementation, CI/CD, production deployment, performance optimisation and troubleshooting. Proven track record of improving application performance, delivering scalable solutions and collaborating with cross-functional Agile teams.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring MVC, Spring Data, Spring Security, Microservices, Python, PHP, REST APIs

Messaging: RabbitMQ, ActiveMQ, Amazon MQ

Data Persistence: MySQL, PostgreSQL, Oracle, MongoDB, Firebase, SQLite, Hibernate, JPA

Cloud & DevOps: AWS (ECS, EC2, S3, RDS, SES, CloudWatch, Lambda), Docker, Docker Compose, Nginx, Tomcat

CI/CD: AWS CodeBuild, AWS CodePipeline, Jenkins, Bitbucket Pipeline, Github Actions, GitLab

Front End: JavaScript/TypeScript, Vue.js, React, Angular, Bootstrap, Material UI, jQuery, Redux, HTML, CSS

Tools and Methods: Git, JIRA, Confluence, Slack, Maven, Gradle, JUnit, Cucumber, Selenium, Agile/Scrum

AI & Developer Tools: GitHub Copilot, Claude Code, Prompt Engineering, BMAD Method (Agile AI-Driven Development)

CAREER HIGHLIGHTS

- Improved backend performance by **50%** through query optimisation and batch process tuning (Complexica AU).
- Delivered demand forecasting microservice reducing inventory waste by **25%** (PFD Foods AU).
- Built high availability backend systems supporting **25,000+** users (Yas Island – Abu Dhabi).
- Developed secure, scalable microservices for real time data integration (Audience Republic AU).

PROFESSIONAL EXPERIENCE

Software Engineer

UNIFI Property — Aug 2024—Feb 2026, Adelaide, SA

- Developed and maintained a cloud-hosted property technology platform using Java, Spring Boot, Vue.js, MySQL and AWS.
- Designed, implemented and integrated RESTful APIs with frontend components to deliver end-to-end application features.
- Developed and enhanced frontend functionality using Vue.js and JavaScript, integrating user interfaces with backend services.
- Designed and optimised MySQL database queries and schemas to improve application performance and data retrieval efficiency.
- Built and maintained CI/CD workflows using GitHub Actions and AWS deployment services to automate application delivery.
- Managed application deployments, AWS infrastructure configurations and production troubleshooting to maintain reliability and availability.
- Collaborated with stakeholders to translate business requirements into maintainable technical solutions.

Software Engineer

Complexica Pty Ltd — July 2021—Aug 2024, Adelaide, SA

- Designed, developed and maintained full-stack enterprise applications using Java, Spring Boot, React, JavaScript and TypeScript.

- Developed responsive frontend components and user interfaces using React, HTML and CSS, integrating them with backend REST APIs.
- Designed and implemented Spring Boot microservices supporting enterprise analytics and business applications.
- Developed RESTful APIs and integration services for communication between internal and external enterprise systems.
- Optimised database queries and batch processing workflows, improving backend performance by 50%.
- Contributed to a demand forecasting solution for PFD Foods, supporting a reported 25% reduction in inventory waste.
- Implemented and maintained CI/CD pipelines using AWS CodeBuild and CodePipeline to streamline application deployment.
- Supported production releases, troubleshooting and application performance improvements.
- Collaborated with business analysts, QA engineers and data scientists within Agile development teams.

Software Developer (Contract)

Jade Walker & Co. Feb 2021—May 2021, Sydney, NSW

- Developed inventory and booking management application using Java Spring Boot and Angular.
- Integrated multiple business systems reducing manual administrative processes.
- Delivered working production demo within tight project timelines.

Software Developer (Contract)

Audience Republic Nov 2020—Feb 2021, Sydney, NSW

- Built a real time data integration service between Shopify and the core platform.
- Delivered a secure and scalable microservices based solution using Java and PostgreSQL to support growing transaction volumes.

Software Engineer

CodeGen International Pvt Ltd Aug 2016—March 2020, Colombo, Sri Lanka

- Engineered backend services for **TravelBox**, CodeGen's enterprise travel platform used by OTAs, DMCs, airlines and global tour operators.
- Developed high availability systems for the **Yas Island – Abu Dhabi** project, supporting **25,000+ users**.
- Developed core travel modules including Search, Pricing, Availability, Booking, Amendments and Cancellations.
- Implemented complex travel business rules such as dynamic pricing, seasonal rates, child/infant policies and supplier specific logic.

Associate Software Engineer

Virtusa Pvt Ltd Feb 2016—Aug 2016, Colombo, Sri Lanka

- Contributed to the RIGOR project using Java, Spring Boot, Spark, and MongoDB.
- Improved project efficiency through advanced Spring Data and Spark implementations.
- Built RESTful services enabling seamless data exchange.

Software Developer Intern

FindMyFare.com Aug 2015—Feb 2016, Colombo, Sri Lanka

- Developed an in-house payment gateway hub, reducing third party transaction fees by **20%**.
- Enhanced user experience and maintained payment gateway solutions using PHP and JavaScript.

EDUCATION

Bachelor of Science (Hons) in Information Technology

Sri Lanka Institute of Information Technology • 2016
